(54) RADIO COMMUNICATION SYSTEM, INFORMATION RETRIEVAL
SERVER AND MOBILE RADIO COMMUNICATION TERMINAL

(57)Abstract:

PROBLEM TO BE SOLVED: To allow an information server to voluntarily acquire position information of a user, to voluntarily collect surrounding area information of the power consumption of the user and to send the information to the user.

SOLUTION: An information retrieval server 3 acquires position information 23 of mobile radio communication terminal equipment 1 from a terminal position information storage device 2 based on a terminal ID21 of the mobile radio communication terminal equipment 1. Then the information retrieval server 3 collects surrounding area information 24 in a cell in which the mobile radio

communication terminal equipment 1 is resident or in its adjacent cell based on the position information 23, adds additional information 25 to distinguish the category of the surrounding area information 24 and sends the result to the mobile radio communication terminal equipment 1.
